This is just to inform you that my group at the U. of Houston has reproduced your Nesults (2. Thys. B 64, 189 (81)) Three weeks ago. A small ac diamagnetic signal was also detected. Magnetic field was found to suppress the transition. I believe that it is superconducty. Now the question is "what phase" or "mused phases". Soon, you will here from we more. Please send me suore information!

My Phone: (202) 357-9737 (713) 749-2842 Your phone No. 7 E.W. Cher (also Physics. Univerthouson) Houston, TX 77004

P.S. Currently, I am the Director of Solid Physic Peogram
